

Global Consensus Statement on Meaningful Adolescent and Youth Engagement

Reporting for the Accountability System

A survey of your organization's approach to meaningful adolescent and youth engagement

Thank you for endorsing the Global Consensus Statement on Meaningful Adolescent and Youth Engagement (MAYE), signalling your organization's commitment and intention to improve MAYE. As promised at the launch of the Statement in November 2018, we are asking the 250+ signatories (organizations, agencies, companies, governments and others) to respond to this survey.

We would be grateful if respondents would provide full and accurate information so that we can collectively improve how we partner with young people in our efforts to achieve the Sustainable Development Goals.

We ask global, regional and federal organizations to submit at least one response to the survey. They may submit multiple responses, for example from separate regions or units, as well as one for the entire organization.

Responses detailing your organization's approach to MAYE will be made publicly available unless you inform us that you would prefer to remain anonymous. Please note that individual organizations will not be graded or ranked. A summary report of the responses will be produced to assess our collective progress towards MAYE and to identify challenges, lessons and best practices.

For the purpose of this survey, the term "youth-led initiative" refers to a wide range of young people's organizations (e.g. networks, collectives, movements, groups, associations) whether or not they are registered as an official non-governmental organization.

Please complete this survey by 10 July 2020.

If you have any questions about completing the survey, please contact Alan Jarandilla Nuñez at ajarandilla@iyafp.org.

*** 1. Please check the boxes below.**

I understand that the data collected by this survey will be collated, stored and analysed in order to monitor and report on progress towards the commitments made in the Global Consensus Statement on Meaningful Adolescent and Youth Engagement.

I understand that responses to this survey will be published online (for the purpose of transparency) unless I send an official communication outlining the reasons why responses from my organization should not be published.

I understand that the survey's findings will be synthesized across all respondents and published as a summary report of collective progress and will not specifically name individuals or organizations without their prior written permission. The findings will be promoted through digital networks for the purpose of information sharing.
